

**COMPARISON OF NON POTABLE WATER PER USER BY USE TO THE WAVEYARD (GALLONS PER PERSON PER DAY)**

The Waveyard is estimated at 32 gallons per person per day <sup>(1)</sup>

(1) Values are estimated based on preliminary planning and layout of recreational amenities

(2) Values are actual usage based on municipal provided data

(3) Values are assumed at 2(X) Riverview Golf Course

(4) Values based on City of Scottsdale public data for maximum water use by golf courses

(5) Values are actual usage based on available ADWR data. Data is averaged over 3 full years of operations, 2001 plant began shutdown procedures.

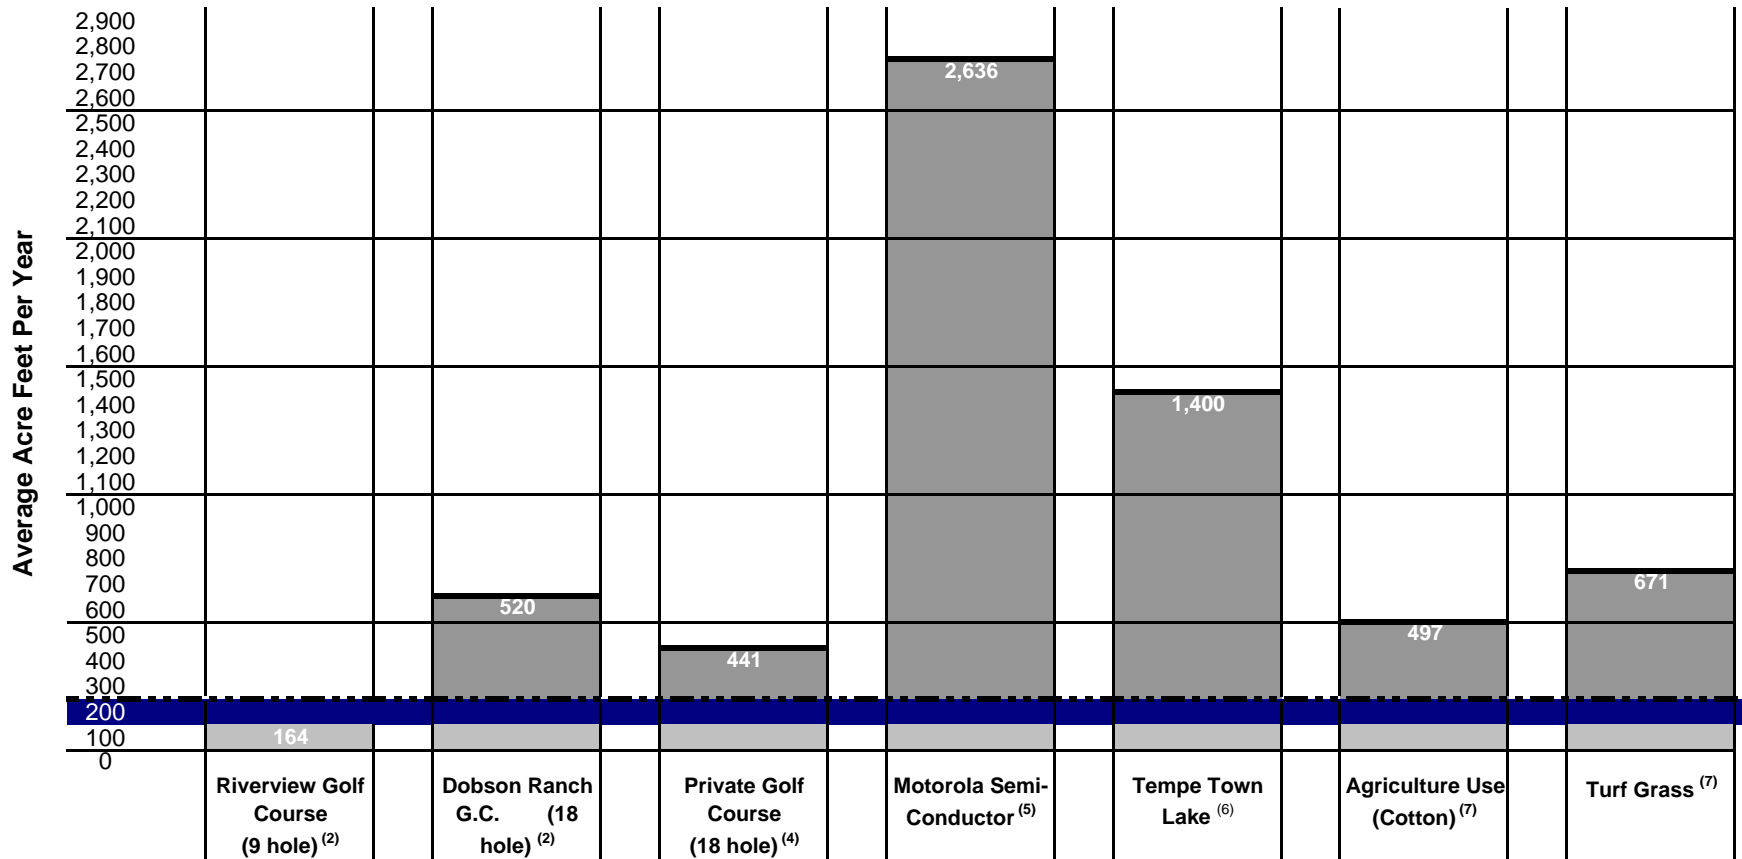

(6) Values are based on base year (2004) for evaporation. Project has not significantly drawn water in last two years due to an excess upstream surface water discharge.

(7) Values are based on reports by the University of Arizona Cooperative Extension. Assumes no users on site.

**COMPARISON OF NON POTABLE WATER VOLUMES BY USE TO THE WAVEYARD (ACRE FEET PER YEAR)**

The Waveyard is estimated at 199 Acre Feet Per Year <sup>(1)</sup>

- (1) Values are estimated based on preliminary planning and layout of recreational amenities
- (2) Values are actual usage based on municipal provided data
- (3) Values are assumed at 2(X) Riverview Golf Course
- (4) Values based on City of Scottsdale public data for maximum water use by golf courses
- (5) Values are actual usage based on available ADWR data. Data is averaged over 3 full years of operations, 2001 plant began shutdown procedures.
- (6) Values are based on base year (2004) for evaporation. Project has not significantly drawn water in last two years due to an excess upstream surface water discharge.
- (7) Values are based on reports by the University of Arizona Cooperative Extension.
